

How are we doing as healthcare professionals treating pain?

- More than 30% of Americans live with chronic pain.
- More people are dying from opioid overdose in America than car accidents.
- America has <5% of the world's population, yet we consume >80% of the opioids.

The Wyoming Physical Therapy Association would like to invite all healthcare professionals for a multidisciplinary approach to treating patients with chronic pain. .

Location

Laramie County Community College
Health Sciences Building, Room 111
1400 E. College Drive, Cheyenne, WY
82007

UNRAVELING THE MYSTERY OF PAIN

The Multi-disciplinary approach to treating chronic pain

WYPTA Spring Conference 2018

May 19 & 20

Cheyenne, Wyoming

**David
Hanscom, MD**

Dr. David Hanscom is an orthopedic surgeon in Seattle, WA specializing in complex spine problems in all areas of the spine. Dr. Hanscom has incredible story on how he found success by suffering with his own chronic pain. As a result, Dr. Hanscom has developed an effective method called “Direct Your Own Care” project. Through this protocol for chronic pain, surgery is placed at the appropriate point along the care pathway. Dr. Hanscom has shared his very successful program on the well-known Dr.

Oz Show, Pain Reframed podcast with Dr. Tim Flynn and Dr. Jeff Moore, and has touched many with his book “Back in Control”.

**Justin
Dunaway,
PT, DPT,
OCS, Cert-
SMT**

Dr. Dunaway has worked in outpatient physical therapy with special interests in orthopedic manual therapy, spine symptoms, and chronic pain. Justin has extensive training and certifications in manual therapy and chronic pain. He spends majority of his time teaching chronic pain and manual therapy seminars for the American Academy of Manipulative Therapy and the Institute of Clinical Excellence. He is also the president of STAND: The Haiti Project. This organization recruits multidisciplinary rehabilitation teams and brings them to rural Haiti in order to deliver much needed care to the people living at the crossroads of poverty and disability.
